Scopus

About Scopus

- **Scopus** is a citation database that indexes journals, trade publications and conference proceedings in the health and natural sciences, social sciences, arts and humanities with citation data available from 1996 to present.
- **Scopus does not have complete citation information for articles published prior to 1996.**
- **Scopus** puts powerful **discovery and analytics tools** in the hands of researchers, librarians, research managers and funders to promote ideas, people and institutions.
- **Scopus** indexes content from 7,000+ **publishers** and includes 91+ million **records**, 94,000+ **affiliation profiles** and 17+ million **authors**.
- **Scopus's** state-of-the-art search tools and filters help uncover relevant information, monitor research trends, track newly published research and identify subject experts. Plus, analytics tools make it easy to visualize, compare and export the data.

Scopus

About Scopus

- **Scopus** includes the records from the MEDLINE and EMBASE databases, among other included sources.
- **Scopus** uses four broad subject areas: **Physical sciences, Health sciences, Social Sciences and Life Sciences.**
- **Scopus allows users to:**
 - Search for articles, conference proceedings, trade publications, and book chapters on a topic
 - Find author information, such as H-index, and lists of publications
 - Locate Impact metrics for a journal title using SNIP, SJR, and ...
 - Perform citation searches on known articles
 - Identify promising journals in which to publish
 - Match an organization with its research output
 - Locate potential collaborators or subject experts
 - Manage your impact with your ORCID ID
 - Set Citation Alerts

About Scopus

Scopus

Figure 17.2. Subject area in Scopus databases during 1959–3th Aug 2021.

Comparison between Scopus and Web of Science

Scopus

Feature	Scopus (as of 01/2020)	Web of Science (as of 01/2020)
<u>Indexed Journals</u>	25,100 active 14,558 inactive	21,100
Indexed Proceedings	120,000 events 9.8 million papers	210,000 events 70 million citations (but individual papers not listed)
Date Range	1970 - present	1900 - present
Update Frequency	Daily	Daily
Citation Analysis	Yes	Yes
Export Records	Yes	Yes
Export Reports	Yes	Yes
Alerts Service	Yes	Yes
Author Profiles	Generated and edited by Scopus Allows linking to <u>ORCID iD</u>	Author created and edited through ResearcherID

- Researcher Discovery

Scopus

Search Form

Scopus

Enter your first search term into the search field. If you have more than one concept to your search, select "Add Search Field" to add additional search fields, or conduct separate searches and combine them later using the "Search" button.

Scopus does NOT have MeSH terms or other subject headings on which to search. Scopus defaults to searching an article's Title, Abstract and Keywords. You can change this in Advanced (see the tab to the left for information on Advanced searching)

Advanced Search

Scopus

- On the Advanced search form, you can create a search using field codes, proximity operators, or boolean operators to narrow the scope of the search.
- To create an advanced search, Click "Advanced Search" from the main search page
- To search for keywords in an article's **title or abstract**, type in TITLE-ABS before your search terms.
- Be sure to use parentheses! For example, this is correct: (TITLE-ABS (children OR pediatrics))
- Scopus needs Boolean operators (AND, OR) to be capitalized.
- To exclude in Scopus, you must use AND NOT (not just 'NOT').

Scopus

Author Name Search

- Scopus is a great place to look for information about a particular author's published works. You can start your search for information on Scopus's main search page by clicking "Authors." While Scopus is a compilation of peer-reviewed articles, it is not comprehensive, so keep in mind that you will only see information about the articles that

Start exploring

 Documents  Authors  Affiliations

Scopus

Author Name Search

- Type in the author's last name, and first name if it will be helpful to locate them. It is often a good idea to put an Affiliation as well.

Search using: Author name ▼

Enter last name *
Westrick

Enter first name
Jennifer

Enter affiliation name
Rush

Author Name Search

Scopus

- The author's information will appear. To see all their published work that has been indexed into Scopus, click the box in front of their name and then click "Show documents."
- If you are checking on your own citations and notice that you have more than one listing, click "Request to merge authors."
- If this is your information and there are multiple BOXES for your name, you can merge them by clicking the "Request to merge authors" link and following the steps.
- For a visual representation of this author's work, click the box for All, then "View citation information."

Scopus Author Identifier

The Scopus Author Identifier assigns a unique number to groups of documents written by the same author via an algorithm that matches authorship based on a certain criteria. If a document cannot be confidently matched with an author identifier, it is grouped separately. In this case, you may see more than one entry for the same author.

[Learn more about rolled up count](#)

Total and specific document counts

Two sets of document counts may appear on this page:

"Documents, affiliation only" - Reflects the number of documents directly associated with that affiliation profile.

"Documents, whole institution" - Reflects the total number of documents associated with that institution - it is the sum of those from the institution itself plus those from the affiliations contained within its hierarchy. Where an institution is not the top level of the hierarchy, only the affiliations below it are included in its total.

Export 20,839 documents to EndNote as a RIS file

The RIS format is used for exporting references from Scopus to a reference management tool (e.g., Zotero, EndNote, RefWorks). To import references to EndNote, open the .ris file with EndNote and follow the prompts. Make sure that .ris files are associated with EndNote on your system.

You can export up to 20,000 documents in RIS format.

Updates in Scopus

About the new Search results page

We created an updated Search results page. Improvements include:

- Searching directly from the results page
- More interactive filters to narrow your results
- A more functional, intuitive layout
- Expanded export functionality

Want to learn more about the Search results page?

[Visit our Support Center](#) for information about the Search results page and how to use it.

How do you like the new Search results page?

Let us know what you think about the updated and enhanced Search results page.

How Can I Assess Journal Impact?

Scopus

- Different measures are used to assess the quality and impact of a journal. These measures are one factor to consider when deciding where to publish your work.

Scopus

Common Measures of Journal Impact

	Impact Factor (IF)	Eigenfactor	SCImago Journal Ranking (SJR)	Source Normalized Impact per Paper (SNIP)
Measure of...	Frequency with which the 'average article' in a journal has been cited in a particular year or other defined time period	Measure of importance: overall value provided by all articles published in a journal in one year	Measure of prestige; accounts for number of citations received by a journal and importance of the journals that citations came from	Measures citation impact by weighting citations based on the total number of citations in a subject field
Calculation	A: Number of citations in the current year to items published in the journal in the previous two years B: Total number of articles published in the journal in the previous two years Impact Factor = A/B	Citations from high-quality journals are weighted more than citations from lesser known journals	Citations from more prestigious journals (higher SJR) weighted more than citations from less prestigious journals (lower SJR)	Citations from subject fields in which citations are less likely are weighted more
Can it be used to compare journals from different disciplines?	No	Yes	Yes	Yes
Where can I get it?	Journal Citation Reports OR the journal's website	Journal Citation Reports OR free from Eigenfactor.org	Scopus OR free from SCImago Journal & Country Rank	Scopus OR free from CWTS Journal Indicators

Journal Impact in Scopus

Scopus

- Scopus is a resource for evaluating and comparing journals. Provides SCImago Journal Ranking (SJR) and Source Normalized Impact per Paper (SNIP) for more than 19,000 journals.
- The Compare Sources feature in Scopus can be used to view and compare the following metrics for up to 10 journals at a time:
 - SJR
 - SNIP
 - Number of citations received in a year
 - Number of documents published in a year
 - Percentage of documents published in a year that have never been cited
 - Percentage of articles that are review articles

Scopus Author Impact

Scopus

- **Select documents to include in citation report:**
- Scopus will display a list of authors that meet your search criteria. Your name may appear more than once.
- To view documents for a particular author, click on the box next to the author name and then, click on **Show documents** at the top of the results
- **Create Citation Report:**
- On the document results page, select the documents that you would like to include in your citation report. To include all documents, click on the box next to **All** at the top of the results.
- Then, click **View citation overview** at the top of the results
- The citation overview displays the number of times each document has been cited
- Click on **View h-graph** to view the h-index for the documents in the citation overview
- To export your citation overview, click the **Export** link in the upper right-hand corner of the page

View author position details

Author position details

The Author position is the position relating to the responsibilities of an author among the co-authors. The Author position information is derived from the 31 documents published in the last 10 years (2013 - 2022).

First author • 0%

The author is the first one in the document

0 Documents 0 Average citations 0 FWCI

Last author • 13%

The author is the last one in the document

4 Documents 9 Average citations 0.544 FWCI

Co-author • 84%

The author is in any other position in the document

26 Documents 10 Average citations 0.595 FWCI

Corresponding author • 3%

The author is the corresponding one in the document

1 Document 1 Average citations 0.493 FWCI

Citation Searching

Scopus

- To find citation counts in Scopus
- Search by the document's title
- In the results list, look in the far-right hand column for the citation count.
- To see what documents cited the document, click on the citation count.

Creating alerts

Scopus

- By registering as a Scopus user, you are able to create search, document, and author alerts to stay up-to-date at your desired frequency. Use these alerts to receive email notices when new documents are loaded on Scopus. From the Alerts page, you can create alerts, view the latest results for an alert, edit alerts, and delete alerts. There is no limit on the number of alerts you can create.
- A Search alert is a saved search that you can schedule to run at certain intervals. If any new results are found, you will receive an email with the first 25 results and a link into Scopus to access all new results. You must be logged in to set an alert or work with your saved alerts.
- **To set a new search alert:**
 - From the Document Search page, perform a new search. The Search results page opens.
 - From the search results page, click **Set alert**. The Set Alert pop-up appears.
 - Set the frequency and day of week to start alerts.

Scopus

To set an author alert:

- From the Author page, perform a new search. The Search results page opens.
- From the search results page, click an author's name. The author details page opens.
- From the author details page, click **Get citation alerts**. The Set Alert Author Citation Alert pop-up opens.

Scopus

To set a document alert:

- From the Document search page, perform a new search. The Search results page opens.
- From the search results page, click an document's name. The Document details page opens.
- From the Document details page, click **Set citation alerts**. The Set Document Citation Alert pop-up opens.

Exporting items to Citation Managers

Scopus

- To export items to SciWheel, EndNote, Zotero, or another citation manager, look in the grey bar (found at the top of your search results) for the words "RIS Export." Note that you can also email citations (with links) to yourself in this bar.
- You can export or email individual citations using the links in this bar, or you can save citations into a List and export/email the entire list at once by using the List function. See "Saving Items in a List" in the tabs to the left for more information.

- The drop-down arrow next to "RIS Export" provides options for what information you'd like to export. We recommend checking of all boxes so that all information is sent.
- Clicking the "RIS Export" button will create a file that will be in your Downloads folder and will probably show in in the grey bar along the bottom of your screen.

Scopus

Analyzing Results

- Scopus offers several built-in functions for analyzing search results. You can find these options here:

AU-ID ("Neal-Perry, Genevieve Scott" 8927373200) OR AU-ID ("[No Author ID found]" 58010594800) OR AU-ID ("Wu, J") OR AU-ID ("Stringer, Elizabeth" 57743109700) OR AU-ID ("Timmons, Douglas B." 57724511000) OR AU-ID ("Jones, Hendrée")

Document title

1 Lifestyle intervention in ovarian cancer enhanced survival (LIVES) study (NRG/GOG0225): Recruitment, retention and baseline characteristics of a randomized trial of diet and physical activity in ovarian cancer survivors

Analyzing Results

Scopus

- The analysis tools provide a summary view of aspects of the search results, such as counts of publications:
- By author
- By document source (ex. Journal Title)
- By affiliation (author organization)
- By document type (ie. journal article, book chapter, etc.)
- And several other criterion

Create Bibliography

Scopus

- With Scopus, you can create a bibliography of articles on the fly.
 1. Select the articles in your search set that you would like to include in your bibliography. You can do this by checking off the boxes of the articles you want, or by using the "add to list" feature to just add those articles you want. When you add the articles to the list, your list will open. From there, select all.
- select articles to include and click on create bibliography

Create Bibliography

Scopus

- 2. Click on the three dots at the top right that indicate "more menu options". Select the option "Create Bibliography".

Print Save as PDF Bibliography: QuikBib

QuikBib allows you to generate a reference list (bibliography) from your selected documents in a variety of widely used output styles.

Format: ☒ HTML ☐ Text

Style: [APA 6th - American Psychological Association, 6t...](#) 

Selected style example:

APA 6th - American Psychological Association, 6th Edition

Author, A. A., Author, B. B., & Author, C. C. (2005).
Title of article. *Title of Journal*, 10(2), 49-53.
